

Leadership Research Leadership and Well-Being

26. February 2026

Dr. Ryan Miller

Post Doctoral Research Associate in Organizational Behavior

ryan.miller@business.uzh.ch

leadthefuture.org

Agenda

1. Quick questions, survey results
2. Introductions
3. Key concepts from reading
4. Martin et al. 2023 discussion & analysis
5. Wrap Up & HW

Results from Introduction Assignment

- Many of you have experience with statistics (Masters, Bachelors)
 - Quick acronym check!
- Many of you have experience with R or other coding languages
- An interest in how to *apply* leadership research
- Experience with investigating research questions (e.g., choosing an experimental design vs. qualitative)
- Q1: The balance between leadership as a topic, versus research methods
- Q2: Choosing a topic for the final paper

Introduction of Key Concepts

- Digestibility check
- Leader Member Exchange (LMX)
 - Resonance
- Well-being:
 - Hedonic, Eudaimonia
 - A need to study multiple facets, more holistically
 - The influence of leader behavior on well-being
- What other terms did you want to discuss?

Summary & Exercise

- Pair up with a classmate
- Create a list of four key points from the section of the article I assign to summarize that section (important constructs, theory, research design)
- In ~15 minutes, we'll reconvene to discuss
- If you complete the task early, complete the same exercise for the analysis section, results section, or discussion.

Discussion of Important Elements

- Experience Sampling Method / Diary Studies
 - What are some advantages / disadvantages?
 - Multilevel analysis and partitioning within- and between-person variance
 - ICC (Intraclass Correlation): The proportion of variance that's between-person (vs within-person day-to-day fluctuation)
 - Reliability (more complicated than usual)
- 

Analysis

Strengths of the article

- Tests LMX dynamically
- Investigates well-being more holistically with two facets (hedonic and eudaimonic)
- Investigates interaction more holistically (frequency, time, % work content)
- Controls for morning well-being (inferences for reverse causality?)

Weaknesses?

- Discussed in class

Limitations?

- Discussed in class

In Summary

1. Introduced important concepts
2. Discussed Martin et al (2023)
3. Lingering questions?

Exercise

Qualitative research: pros, cons,
concerns?

Next Week

Read Pratt (2025)

- Prepare to discuss in class
- Before reading next week's article: two points regarding strengths/weaknesses of qualitative research.
 - Initial impressions
- Upload to OLAT
